

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878

SAFETY DATA SHEET

Autocryl Plus MM A235 Red (orange)

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Autocryl Plus MM A235 Red (orange)
S11408

: Product name
: SDS code

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses
Industrial use
Uses advised against
Consumer use

: Product use

1.3 Details of the supplier of the safety data sheet

Akzo Nobel Car Refinishes bv
Rijksstraatweg 31
2171 AJ Sassenheim
The Netherlands
+ 31 (0)71 308 6944
www.sikkensvr.com

: Manufacturer

PSRA_SSH@akzonobel.com

: e-mail address of person responsible for this SDS

1.4 Emergency telephone number

+ 31 (0)71 308 6944

: Telephone number
: Hours of operation

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Mixture

: Product definition

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226
Skin Sens. 1, H317
STOT SE 3, H336
Aquatic Chronic 3, H412

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

1.02 : Version

Date of issue/Date of revision

: 7/26/2023

1/15

Date of previous issue

: 7/26/2023

SECTION 2: Hazards identification

2.2 Label elements

: Hazard pictograms

Warning

: Signal word

Flammable liquid and vapour.

: Hazard statements

May cause an allergic skin reaction.

May cause drowsiness or dizziness.

Harmful to aquatic life with long lasting effects.

Precautionary statements

Wear protective gloves. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

: Prevention

Not applicable.

: Response

Store in a well-ventilated place.

: Storage

Not applicable.

: Disposal

n-butyl acetate

: Hazardous ingredients

Reaction mass of bis(1,2,2,6,6-pentamethyl-4-piperidyl) sebacate and methyl

1,2,2,6,6-pentamethyl-4-piperidyl sebacate

methacrylic acid, monoester with propane-1,2-diol

n-butyl methacrylate

Repeated exposure may cause skin dryness or cracking.

: Supplemental label elements

Not applicable.

: Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

Special packaging requirements

Not applicable.

: Containers to be fitted with child-resistant fastenings

Not applicable.

: Tactile warning of danger

2.3 Other hazards

None known.

: Other hazards which do not result in classification

SECTION 3: Composition/information on ingredients

Mixture

: 3.2 Mixtures

Type	Regulation (EC) No. 1272/2008 [CLP]	%	Identifiers	Product/ingredient name

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Type

- [1] Substance classified with a health or environmental hazard
- [2] Substance with a workplace exposure limit
- [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
- [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII
- [5] Substance of equivalent concern
- [6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid measures

In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and seek medical advice.	: General
Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.	: Eye contact
Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.	: Inhalation
Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.	: Skin contact
If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.	: Ingestion
No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.	: Protection of first-aiders

4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Contains Reaction mass of bis(1,2,2,6,6-pentamethyl-4-piperidyl) sebacate and methyl 1,2,2,6,6-pentamethyl-4-piperidyl sebacate, methacrylic acid, monoester with propane-1,2-diol, n-butyl methacrylate. May produce an allergic reaction.

4.3 Indication of any immediate medical attention and special treatment needed

In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

No specific treatment.

See toxicological information (Section 11)

SECTION 5: Firefighting measures

5.1 Extinguishing media

Recommended: alcohol-resistant foam, CO ₂ , powders, water spray.	: Suitable extinguishing media
Do not use water jet.	: Unsuitable extinguishing media

SECTION 5: Firefighting measures

5.2 Special hazards arising from the substance or mixture

Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.

: **Hazards from the substance or mixture**

Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.

: **Hazardous combustion products**

5.3 Advice for firefighters

Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.

: **Special protective actions for fire-fighters**

Appropriate breathing apparatus may be required.

: **Special protective equipment for fire-fighters**

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Exclude sources of ignition and ventilate the area. Avoid breathing vapour or mist. Refer to protective measures listed in sections 7 and 8.

: **For non-emergency personnel**

If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

: **For emergency responders**

Do not allow to enter drains or watercourses. If the product contaminates lakes, rivers, or sewers, inform the appropriate authorities in accordance with local regulations.

: **6.2 Environmental precautions**

Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Preferably clean with a detergent. Avoid using solvents.

: **6.3 Methods and material for containment and cleaning up**

See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal protective equipment.

See Section 13 for additional waste treatment information.

: **6.4 Reference to other sections**

SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1 Precautions for safe handling

Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

: **Protective measures**

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

: **Advice on general occupational hygiene**

SECTION 7: Handling and storage

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

7.3 Specific end use(s)

Not available.

: Recommendations

Not available.

: Industrial sector specific solutions

SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

8.1 Control parameters

Occupational exposure limits

Exposure limit values	Product/ingredient name
EU OEL (Europe, 10/2019). Absorbed through skin. Notes: list of indicative occupational exposure limit values STEL: 442 mg/m ³ 15 minutes. STEL: 100 ppm 15 minutes. TWA: 221 mg/m ³ 8 hours. TWA: 50 ppm 8 hours.	Reaction mass of ethylbenzene and xylene
EU OEL (Europe, 2/2017). Absorbed through skin. Notes: list of indicative occupational exposure limit values STEL: 550 mg/m ³ 15 minutes. STEL: 100 ppm 15 minutes. TWA: 275 mg/m ³ 8 hours. TWA: 50 ppm 8 hours.	2-methoxy-1-methylethyl acetate

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

: Recommended monitoring procedures

8.2 Exposure controls

AkzoNobel	1.02 : Version	Date of issue/Date of revision	: 7/26/2023
	6/15	Date of previous issue	: 7/26/2023

SECTION 8: Exposure controls/personal protection

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapours below the OEL, suitable respiratory protection must be worn.

: **Appropriate engineering controls**

Individual protection measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

: **Hygiene measures**

Use safety eyewear designed to protect against splash of liquids.

: **Eye/face protection**

Skin protection

For prolonged or repeated handling, use the following type of gloves:

: **Gloves**

May be used: neoprene, nitrile rubber, butyl rubber

The recommendation for the type or types of glove to use when handling this product is based on information from the following source:

Best Practice Guideline 5 "Safe Use of Gloves" (June 2010) published by the European Solvents Industry Group (ESIG), available at <http://www.esig.org/en/library/publications/best-practice-guides>

The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.

Personnel should wear antistatic clothing made of natural fibres or of high-temperature-resistant synthetic fibres.

: **Body protection**

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

: **Other skin protection**

If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators.

: **Respiratory protection**

Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/or hazardous fumes. Wet sanding/flatting should be used wherever possible. If exposure cannot be avoided by the provision of local exhaust ventilation, suitable respiratory protective equipment should be used.

Do not allow to enter drains or watercourses.

: **Environmental exposure controls**

SECTION 9: Physical and chemical properties

SECTION 10: Stability and reactivity

No specific test data related to reactivity available for this product or its ingredients.	: 10.1 Reactivity
Stable under recommended storage and handling conditions (see Section 7).	: 10.2 Chemical stability
Under normal conditions of storage and use, hazardous reactions will not occur.	: 10.3 Possibility of hazardous reactions
When exposed to high temperatures may produce hazardous decomposition products.	: 10.4 Conditions to avoid
Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.	: 10.5 Incompatible materials
Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.	: 10.6 Hazardous decomposition products

SECTION 11: Toxicological information

11.1 Information on toxicological effects

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Contains Reaction mass of bis(1,2,2,6,6-pentamethyl-4-piperidyl) sebacate and methyl 1,2,2,6,6-pentamethyl-4-piperidyl sebacate, methacrylic acid, monoester with propane-1,2-diol, n-butyl methacrylate. May produce an allergic reaction.

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods**Product**

SECTION 13: Disposal considerations

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

: **Methods of disposal**

Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 2008/98/EC.

: **Hazardous waste**

Do not allow to enter drains or watercourses.

: **Disposal considerations**

Dispose of according to all federal, state and local applicable regulations.

If this product is mixed with other wastes, the original waste product code may no longer apply and the appropriate code should be assigned.

For further information, contact your local waste authority.

European waste catalogue (EWC)

The European Waste Catalogue classification of this product, when disposed of as waste, is:

Waste designation	Waste code
waste paint and varnish containing organic solvents or other hazardous substances	EWC 08 01 11*

Packaging

The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

: **Methods of disposal**

Using information provided in this safety data sheet, advice should be obtained from the relevant waste authority on the classification of empty containers.

: **Disposal considerations**

Empty containers must be scrapped or reconditioned.

Dispose of containers contaminated by the product in accordance with local or national legal provisions.

This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

: **Special precautions**

Section 14. Transport information

IATA	IMDG	ADR/RID	
UN1263	UN1263	UN1263	14.1 UN number
PAINT	PAINT	PAINT	14.2 UN proper shipping name
3 	3 	3 	14.3 Transport hazard class(es)
III	III	III	14.4 Packing group
No.	No.	No.	14.5 Environmental hazards

Additional information

AkzoNobel	1.02 : Version	Date of issue/Date of revision	: 7/26/2023
	12/15	Date of previous issue	: 7/26/2023

Section 14. Transport information

Viscous liquid exception This class 3 viscous liquid is not subject to regulation in packagings up to 450 L according to 2.2.3.1.5.1. : **ADR/RID**

Tunnel code (D/E)

Emergency schedules F-E, _S-E_ : **IMDG**

Viscous substance exemption This class 3 material is subject to limited regulatory requirements if shipped in packages upto 450 L.

Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage. : **Special precautions for user**

Not available. : **Transport in bulk according to IMO instruments**

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorisation

Annex XIV

None of the components are listed.

Substances of very high concern

None of the components are listed.

Not applicable.

: **Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles**

Other EU regulations

Ozone depleting substances (1005/2009/EU)

Not listed.

Prior Informed Consent (PIC) (649/2012/EU)

Not listed.

Seveso Directive

This product may add to the calculation for determining whether a site is within the scope of the Seveso Directive on major accident hazards.

National regulations

The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks, as required by other health and safety legislation. The provisions of the national health and safety at work regulations apply to the use of this product at work.

: **Industrial use**

No Chemical Safety Assessment has been carried out.

: **15.2 Chemical safety assessment**

SECTION 16: Other information

1

: CEPE code

Indicates information that has changed from previously issued version.

ATE = Acute Toxicity Estimate

CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008]

DMEL = Derived Minimal Effect Level

DNEL = Derived No Effect Level

EUH statement = CLP-specific Hazard statement

PBT = Persistent, Bioaccumulative and Toxic

PNEC = Predicted No Effect Concentration

RRN = REACH Registration Number

vPvB = Very Persistent and Very Bioaccumulative

: Abbreviations and acronyms

Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Justification	Classification
On basis of test data	Flam. Liq. 3, H226
Calculation method	Skin Sens. 1, H317
Calculation method	STOT SE 3, H336
Calculation method	Aquatic Chronic 3, H412

Full text of abbreviated H statements

Flammable liquid and vapour.	H226
May be fatal if swallowed and enters airways.	H304
Harmful in contact with skin.	H312
Causes skin irritation.	H315
May cause an allergic skin reaction.	H317
Causes serious eye irritation.	H319
Harmful if inhaled.	H332
May cause respiratory irritation.	H335
May cause drowsiness or dizziness.	H336
Suspected of damaging fertility.	H361f
May cause damage to organs through prolonged or repeated exposure.	H373
Very toxic to aquatic life.	H400
Very toxic to aquatic life with long lasting effects.	H410
Toxic to aquatic life with long lasting effects.	H411
Harmful to aquatic life with long lasting effects.	H412

Full text of classifications [CLP/GHS]

ACUTE TOXICITY (dermal) - Category 4	Acute Tox. 4, H312
ACUTE TOXICITY (inhalation) - Category 4	Acute Tox. 4, H332
SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 1	Aquatic Acute 1, H400
LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 1	Aquatic Chronic 1, H410
LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 2	Aquatic Chronic 2, H411
LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3	Aquatic Chronic 3, H412
ASPIRATION HAZARD - Category 1	Asp. Tox. 1, H304
Repeated exposure may cause skin dryness or cracking.	EUH066
SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2	Eye Irrit. 2, H319
FLAMMABLE LIQUIDS - Category 3	Flam. Liq. 3, H226
REPRODUCTIVE TOXICITY (Fertility) - Category 2	Repr. 2, H361f
SKIN CORROSION/IRRITATION - Category 2	Skin Irrit. 2, H315
SKIN SENSITISATION - Category 1	Skin Sens. 1, H317
SKIN SENSITISATION - Category 1A	Skin Sens. 1A, H317
SPECIFIC TARGET ORGAN TOXICITY - REPEATED EXPOSURE - Category 2	STOT RE 2, H373
SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE (Respiratory tract irritation) - Category 3	STOT SE 3, H335
SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE (Narcotic effects) - Category 3	STOT SE 3, H336
